
Specifications

CSI-0701 Flexible Barrier with 3M™ Tape, Single

This self adhesive flexible barrier creates a water dam that collapses and bounces back when rolled over by shower chairs and prevents water from flowing out onto the bathroom floor.

Ideal for curbless showers and other areas where water needs to be contained.

- Description: EPDM Sponge Rubber Seal with 3M™ Tape, Single Strand
 - 3M Acrylic Automotive grade tape creates the ultimate bond to the rubber and the ultimate bond to the substrate.
 - Creates a moisture barrier and air tight seal between rubber and substrate.
 - Highest peel and shear resistance, can be used under high loads of stress and force.
 - Has low initial tack for easy re-positioning during installation and needs 72 hours of cure time to come to full bond strength.
 - Good heat performance -20F to +158F.
 - Mold and Mildew resistant.
 - Packaging: 125 ft. reel/box
 - End Caps available and sold separately. Recommended for installation on radius (floor to wall) showers.
