COMPONENT SOURCING INTERNATIONAL ACQUIRES SENSOURCE, EXPANDING GLOBAL SOURCING AND MANUFACTURING CAPABILITIES

Strategic acquisition adds established in-country teams, specialized manufacturing expertise and an expanded global supplier network

CHARLOTTE, N.C. — September 3, 2026 — Component Sourcing International (CSI), a global sourcing and supply chain management company specializing in engineered components and a CPC operating company, today announced the acquisition of SenSource Global Sourcing, LLC, an international sourcing and supply chain company based in Milford, Ohio.

The acquisition brings together two highly complementary organizations with similar approaches to global sourcing, engineered component supply and hands-on supply chain management. SenSource adds established in-country teams in China, Taiwan, and India, along with specialized expertise in gears, machined shafts, and multi-process castings. These capabilities strengthen CSI's existing global sourcing platform while expanding the manufacturing expertise and resources available to customers.

“SenSource is a natural fit for CSI because of how closely our businesses, values, and approaches to customer service align,” said Jay Glasscock, CSI’s Chief Executive Officer. “They have built an exceptional team with deep expertise and strong relationships across their customer and supplier networks. By bringing our organizations together, we can build on the strengths of both companies and offer customers an even broader range of sourcing, engineering, and supply chain capabilities.”

SenSource provides end-to-end supply chain management and consultative support, including engineered product sourcing, sourcing-region selection, logistics, warehousing, inventory management, and product development. Its in-country teams work directly with suppliers throughout the quoting, tooling, sampling, quality and delivery processes.

For CSI, those teams significantly expand its on-the-ground presence in regions where the company already sources, providing established expertise, supplier relationships and complementary capabilities that accelerate the company's strategic growth objectives. SenSource also expands CSI's capabilities in areas including gears, splines and aluminum die casting and brings additional experience across markets including medical and dental, automotive, agriculture and off-road, infrastructure and utilities, construction, and appliances.

For SenSource customers, joining CSI provides access to a broader global sourcing organization and expanded manufacturing and supply chain capabilities while preserving the relationships, service and expertise they rely on today.

“We've built SenSource around strong relationships with our customers and suppliers and experienced people on the ground who understand the products, processes and markets we serve,” said Mike Rusconi, Vice President of Sales and Marketing at SenSource. “CSI shares that approach. Joining CSI gives our team and our customers access to additional capabilities and resources while allowing us to build on the strengths that have made SenSource successful. We're excited about what our organizations can accomplish together.”

CSI and SenSource will take a deliberate, phased approach to bringing the organizations together, with business continuity for customers, employees, and supplier partners remaining the combined organization's top priority. Existing relationships and day-to-day operations will remain the priority during the initial transition as the teams begin working together and identifying opportunities to share expertise and best practices.

The acquisition also represents the continued growth of CSI under CPC's long-term ownership model. CPC is an investment holding company focused on buying, building and holding businesses for the long term.

The acquisition closed on August 31, 2026.

###

About Component Sourcing International

Component Sourcing International (CSI) is a global sourcing and supply chain partner specializing in engineered components for OEMs. Through a global network of ISO-certified manufacturing partners and internal manufacturing capabilities, CSI delivers precisely manufactured, rigorously qualified components backed by engineering expertise and

hands-on service. From sourcing and production to inventory management and fulfillment, CSI helps customers simplify supply chain complexity, reduce risk and improve performance through flexible solutions tailored to their needs.
